EXECUTIVE OVERVIEW

Batch to release for manufacturers.

Zyvor Pharma QMS is Zyvor AI Labs' manufacturing quality system: one spine from batch and eBMR through laboratory and QA to release and recall — with India Schedule M, US FDA and EU GMP market modules. Distinct from retail Zyvora Pharmacy.

59
modules in the feature catalogue

18
market / regulatory modules

4
deploy paths (FluxVM, compose, k3s, Windows)

What it covers

Manufacturing	Batches, recipes, eBMR steps, IPC, line clearance, cleaning, packaging, retains.
Laboratory	Samples, results, specs, automatic OOS, second-person verify.
Quality	Deviations, CAPA, complaints, audits, risk, QA approvals, release checklist.
Traceability	Genealogy, CoA draft, quarantine, recalls.
Markets	APQR / APR / PQR, self-inspection, PV, field alerts, EU QP, serialization, GDP, licences, water, ALCOA+.
Plant ops	Stability, environment, warehouse, documents, training, change control, equipment.

Why organisations evaluate it

One release spine
Manufacturing, lab and QA share the same batch record instead of three spreadsheets.

Market-aware pilot
India, US and EU modules as electronic records — not live gateway filings.

Yours to run
Self-hosted Postgres + Go API. Native macOS / Windows launchers or compose / k3s.

Honest by design
Pilot-ready status and non-claims are printed on the product, the site and this sheet.

Status. Pilot electronic records only. **Not a validated system. Not 21 CFR Part 11 / Annex 11 / WHO certified.** Synthetic or non-regulated demonstration data. Do not use for regulated release without your own validation.
