MODULE GUIDE

What each area does.

Counts come from the product feature catalogue (`/api/v1/features`). Pilot electronic records — not validated.

Manufacturing

Batches	Create and progress manufacturing batches through the release spine.
Recipes	Bill of materials / process recipes linked to batches.
eBMR	Electronic batch manufacturing record steps and sign-offs (pilot).
IPC	In-process controls recorded against the batch.
Line clearance	Clearance checks before a campaign continues.
Cleaning / packaging / retains	Plant floor adjacent records on the same spine.

Laboratory

Samples & results	Log samples, enter results against specifications.
Specs	Specification limits used for automatic OOS detection.
OOS	Out-of-specification investigations as first-class records.
Second-person verify	Independent verification before results count for release.

Quality & release

Deviations / CAPA	Quality events and corrective / preventive actions.
Complaints / audits / risk	Post-market and internal quality governance stubs.
QA approvals	QA disposition on the batch path.
Release checklist	Structured gates before release / recall actions.

Materials, traceability, plant

Lots / quarantine	Material lots with quarantine and release states.
Suppliers / SCAR	Supplier records and corrective action requests.
Genealogy	Forward / backward batch genealogy.
CoA / recalls	Certificate of analysis draft and recall case records.
Stability / environment	ICH-style studies, pulls, env readings, excursions.
Warehouse	Locations and inventory moves.
Documents / training / change / equipment / labels	Governance modules beside the release spine.

Platform

Document control & training	Revisions with independent approval, effective dating, periodic review, controlled copies; training matrix and scored exams.
Workflow & equipment	Tasks with reminders and escalation (in-app, email, webhook); calibration and preventive-maintenance plans.
Trends & SPC	OOS, CAPA and deviation trends; SPC control charts with Cpk; indicative scorecard.
Supplier portal & integrations	Scoped supplier logins; API keys, webhooks, CSV import.
Notifications	In-product notifications.
Reports / search / metrics	Operational views over pilot data.
Audit	Hash-chained application audit trail with review by exception.
Feature catalogue	`GET /api/v1/features` and markets summary — source of truth for module lists on the site.

Module names describe capability shape for evaluation. Presence of a module is **not** a GMP or Part 11 compliance claim.

Market / regulatory modules (18)

APQR / APR / PQR	India Schedule M product quality review · US annual product review · EU PQR stubs.
Self-inspection	Scheduled internal inspections with market scope.
Pharmacovigilance	AE / PV case stubs for MAH-style walkthroughs.
Field alerts / FAR	Field alert report style records (US-oriented).
EU QP	Qualified Person release attestation stubs.
Serialization	Scheme-tagged serial events (India TTS / DSCSA / FMD labels) — not live repositories.
Validation + CSV	System / CSV inventory for honest Part 11 readiness discussions.
Tech transfer / GDP	Transfer and distribution practice records.
Licences / MA	CDSCO / FEI / MIA-style licence tracking fields.
Water / inspections	Utilities and regulatory inspection observation stubs.
ALCOA+ / hygiene / hold-time / export CPP	Additional abroad / plant hygiene and export packs.
