India · US · EU · abroad.

Electronic-record modules mapped to common regulatory expectations. No live gateway integrations. Pilot, not validated, synthetic data only.

Module	India	US	EU / global
Product quality review	Schedule M APQR	21 CFR 211.180(e) APR	EU GMP PQR / ICH Q10
Self-inspection	Schedule M annual	Internal audit programme	Self-inspection / PIC/S
Pharmacovigilance	CDSCO PV guidance	AE / FAR adjacent	PV / E2B-shaped stubs
Field alerts	—	FAR-style records	—
QP release	—	—	EU QP attestation stub
Serialization	India TTS labels	DSCSA labels	FMD labels
Validation / CSV	Schedule M + systems	Part 11 readiness inventory	Annex 11 / 15 shaped
Licences	CDSCO / Form tracking	FEI / establishment	MIA / MA numbers
Water systems	Schedule M PW/WFI	USP water	Ph. Eur. / WHO
Inspections	CDSCO / state FDA	Form 483 / EIR tracking	Inspectorate observations
ALCOA+	DI alignment	FDA DI guidance	MHRA / WHO DI
GDP / tech transfer	Distribution / transfer	Transfer packs	GDP / transfer

India readiness aids

- **Revised Schedule M readiness checklist:** 17 clauses, each pointing to the module that holds evidence, with status, owner, evidence note and due date. Self-assessment only: no compliance determination, not a CDSCO filing; the clause list is a paraphrase to check against the current notified text. Shared across sites.
- **Inspection kit export:** zip of JSON records (deviations, training, self-inspections, regulatory inspections, product quality reviews, Schedule M) plus a manifest, for inspection preparation. No PDF, no attachments, no date or product filter, no role check beyond sign-in. Not a regulatory submission.
- **GS1 / QR label payloads:** builds a GS1 element string (GTIN, batch, dates) with sanity checks. No barcode or QR image is rendered, the GTIN check digit is not validated, and there is no printer or GS1 registry integration. Not a CDSCO-validated encoding.

Deliberately out of scope here

- **GST / e-invoice / GSTR** — commercial tax; belongs in ERP or retail billing, not manufacturing QMS.
- Live CDSCO SUGAM, FDA ESG, EMVS, NMVS, or DSCSA hub connectivity.
- Full PSUR authoring or validated submission packs.

Pilot stubs only. Mapping language helps evaluators navigate; it is not a claim that the software is Schedule M / FDA / EU GMP compliant.
